Product Description

60W Ultrasonic Cleaner for Cosmetic Brush 40KHz with Heating Function

Application of ultrasonic cleaning machine to wash pipes:

For a pipe, cleaning the outside of it may be relatively simple, and labor can be done simply. But for the inside of the tube, it is very difficult to clean. The dirt attached to the inside of the pipe is a place that cannot be touched by human hands, which increases the difficulty of cleaning. However, for ultrasonic waves, it can penetrate the surface of the tube, so that the dirt attached to the inside of the tube is loosened and detached, thereby achieving the cleaning effect.
